

# POCKETTRACKER

---

## MOBILE ID TRACKING & VERIFICATION

PockeTracker is a powerful and efficient verification and attendance tool, enabling you to verify privileges and access to events and facilities with your smartphone or tablet. You can easily switch between profiles on the device, giving you the freedom to validate multiple privileges without reconfiguration.

---

### Efficiency & Control

Permits or denies entry based on user-defined personal criteria. Validation results are clearly displayed using green background for "APPROVED" and red for "DENIED"

### Keep Thorough Records

Records transactions by name, time and event. All logged transaction data is available for auditing.

### Increase Security

Scans any ID Card and displays personal data and photo. Status fields are included in the results giving the operator actionable information.

### Multiple Scanning Technologies

Supports and interfaces with whatever ID Card technology you are using including: Mag Stripe, Barcode and Contactless.

### Key Features

- Low cost hardware
- Android and iOS
- Anywhere access
- Wifi, 3G/4G and offline
- Pre-configure privileges
- Easily connect to multiple data sources
- Prevent fraudulent entry
