

EliteID

MODERN ID BADGE PRODUCTION

Cloud-based ID Management

Capture ID photos, manage cardholders, print ID badges and more from any internet connected computer or mobile device.

ELITEID

Features

- Included badge designer
- ISO management
- Easy enrollment
- Batch data import
- User defined Person fields
- CloudCard integration
- Mobile photo capture
- Support for multiple print stations
- Automatic updates... *and more!*

Data Driven Design

Easily manage records by cardholder group and view real-time statistics from a modern dashboard. EliteID uses your existing data and automation to make ID production efficient and user-friendly.

Enrollment is as Easy as 1-2-3

The guided enrollment workflow ensures the required information and ID photo are collected before the ID is printed.

Cross-Platform System Integration

EliteID is versatile and open for integration with many popular transaction systems and hardware configurations.

Small System Footprint

EliteID is cloud-based and does not require an onsite server or database. A Windows PC is necessary to connect an ID printer.

Desktop or Mobile Photo Capture

Use your computer's integrated/USB webcam or any mobile device to capture ID photos quickly and easily.

Fully Scalable

Each subscription comes with unlimited cardholder records and card designs. The software is fully scalable for any organization.
